

RISE HIRE — PRD

AI Recruitment Assistant | IDS PFF FQIA #3

PROBLEM

Manual CV triage is slow and inconsistent.
Recruiters lose time and miss qualified candidates.

SOLUTION

Rise Hire automates extraction + scoring,
ranking candidates against job requirements.

CORE TEAM & DEPARTMENTS

STATUS: Backend complete, frontend integration in progress.

Goal: production-ready hiring workflow for RH teams with transparent scoring.

API DOCUMENTATION

Frontend integration guide (requests, responses, errors)

CORE ENDPOINT GROUPS

INPUT

GET /health, GET /version
Purpose: service status + deployment diagnostics
Response: {status, service, version}

OUTPUT

POST /api/candidates/upload-cv
multipart/form-data + metadata
Response: candidate_id + parsed profile

GET /api/candidates, /api/rankings
GET /api/rankings/export.csv
Pagination: {items, total, page, size}

AUTH / PROCESS

POST /api/auth/register, /login
GET /api/auth/me, POST /logout
Error shape: {detail, code}

POST /api/scoring/evaluate
Inputs: candidate_profile + job_requirements
Output: score, breakdown, explanation

HTTP semantics: 200/201 success, 400 validation, 401 auth, 404 not found, 500 processing error.
Frontend should surface detail + retry guidance.

Frontend contract: use docs/API.md as source of truth for schemas, status codes, and error payloads.

SPRINT TIMELINE

Project execution from scope lock to production-ready system

Execution history aligned with IDS Sujet 3

DISCOVERY → DESIGN → DELIVERY

SPRINT 1 — Scope & PRD

- 2 alignment meetings to lock project scope
- Scope anchored on IDS "Sujet 3".
- Team discussed requirements one by one.
- Output: consolidated PRD and delivery plan

SPRINT 2 — Discovery & Infra

- Yassir + Brahim built RH ambiguity survey for "metier secret" requirements.
- Otman created branding, name "Rise Hire" and full brand book for frontend.
- Mohamed designed backend architecture and prepared infrastructure.

SPRINT 3 — Build & Validation

- Chaimae stress-tested extraction prompts.
- Mohamed implemented scoring design from GUIDE_MOHAMED_SCORING_DESIGN.m
- Yassir built full backend + integrations.
- Brahim refined extraction/scoring notebooks
- Otman built frontend implementation.

Outcome: A complete AI recruitment system ready for final frontend connection and delivery.

ARCHITECTURE & WORKFLOW

Data flow and department connections across the Rise Hire platform
